PROFILE

Mid-level Full Stack Developer specializing in Artificial Intelligence and Cloud Computing (Azure). Extensive experience in optimized coding, the design and implementation of scalable architectures, and continuous improvement of web and desktop applications. Strong skills in frontend (HTML, React, Vite, .NET) and backend (C#, .Net Core, Python, Java) development. Proficient in working with SQL Server and Azure SQL databases. Distinguished by teamwork, organizational skills, complex problem-solving abilities, and a track record of delivering high-impact technological solutions.

EMPLOYMENT HISTORY

❖ **Web Application Development - Incident Management** Nov - Dic 2019

- Implemented a web solution to record and manage incidents for the Information Technology Unit (UTI) at UNJBG, using a technology stack that included HTML, CSS, JavaScript, PHP, and MySQL.

❖ **Analytics Support, Big Data Solution Architect** May 2020 - May 2026

- Coded and designed an operator dashboard for mining trucks. (Technology stack: HTML, CSS, JavaScript, Python, Flask, SQL Server).
- Created an intelligent web chatbot with workflows and users. (Technology stack: HTML, CSS, JavaScript, Python, Flask, SQL Server).
- Migrated REST API data to SQL Server, with and without an interface, using an automated Task Scheduler. (Technology stack: C# .NET Framework, SQL Server).
- Created a .NET Intellex web app to display external data migrated from Parquet in Blob Storage. (Technology stack: HTML, CSS, JavaScript, .NET, Azure).
- Developed REST API solutions to integrate and migrate business data from platforms such as Centinela, FastField, FirstPriority, Inmation, MineraAndinaSol, and VisionLink to SQL Server. (Technology stack: .NET, Python, Azure).
- Created a UTM-to-latitude-and-longitude query for plotting and interacting with data in Power BI using R. (Technology stack: R, Power BI, SQL Server).
- Deployed Azure resources using PowerShell. (Technology stack: Azure REST API, PowerShell, JSON).

TECHNICAL SKILLS

Frontend			Backend		
HTML	React	Jinja2	Azure	Python	PHP
Bootstrap	Vite	PowerBI	SQL	.NET	R
